

Bear's Series: Mathematics (CDs included)

New

About the Series ...

Bear's Math & Arts series are intended to:

- complement and support the core mathematics, the arts curriculum, and language arts program by presenting numeracy, drama/dance, music, visual arts, and literacy strategies in meaningful and appealing contexts
- connect directly with the mathematics and arts programs by offering leveled stories that link to each of the math and arts strands: number sense and numeration, measurement, geometry and spatial sense, patterning and algebra, data management and probability, drama/dance, music, and visual arts
- focus on the development of reading strategies and skills, while direct touchpoints with writing, listening, speaking, and visual communication/media literacy support the need for balance in a language program, and for the natural integration of the language processes
- recognize children's diverse learning styles, varied abilities, and multiple intelligences
- recognize the centrality of language in all learning, and the importance of oral language as the foundation for literacy
- provide ongoing, formative assessment opportunities that inform and shape instruction, and develop children's reflection and self-assessment

Bear's Math & Arts series offer just the right text for just the right child!

Bear's Series: Arts (CDs included)

Bear's Series: Mathematics Connections

Theme	K/Early Emergent	Grade 1	Grade 2
Number Sense	<ul style="list-style-type: none"> Too Many Dogs Skunk Wants to Play 	<ul style="list-style-type: none"> One Is Enough Blast Off! 	<ul style="list-style-type: none"> Please Waited to be Seated Just the Facts
